

SPLITTING USERSTORIES

- How do you eat an elephant?
- One bite at a time.
- I know this is a cheesy joke, but in real work, teams often have to work on user stories or features that are complex or huge, and it can feel like eating an elephant.

Splitting the user story

- 1. optimizes and focuses on the 20% of the work that is highly valuable
- 2. deprioritizes the stories that are not so valuable

2. Teams split user stories because they have a shorter iteration.

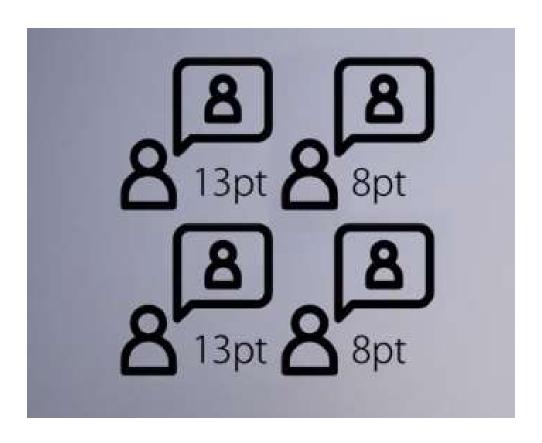

Some stories done is way better than everything undone.

3. Splitting a user story can help the team to gain visibility and clarity into its true size.

Some user stories need "end-to-end" testing.

Some user stories may need to be tested in a mock environment.

Start with the simplest thing that could potentially work

(One of the Agile Principles)

Farmer trying to take payment from a mobile phone app

As a merchant (farmer),
I want to take payment from my customers,
So that I can get paid for the products that I sell

As a merchant,

I want to accept payment using a mobile device (like Square cash) that allows customers to swipe their debit or credit card

As a potential home buyer,

I want to calculate my mortgage payments,

so that I can decide which type of loan is right for me.

SPLIT 1: (simple)

As a potential home buyer,

I want to calculate my payments manually

SPLIT 2:

As a potential home buyer,

I want to calculate my payments using online spreadsheet template

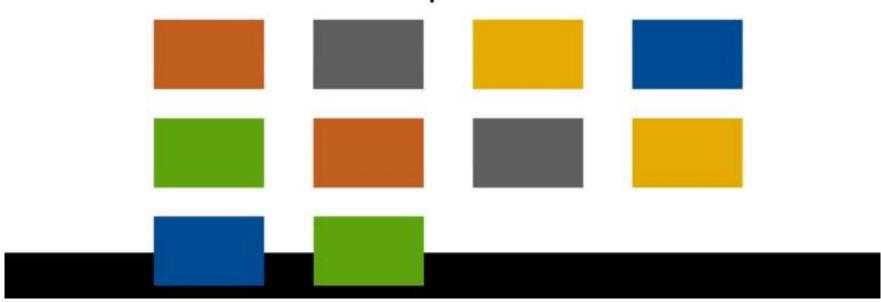

SPLIT 3:

As a potential home buyer,

I want to calculate my payments using online an online calculator

Workflow Steps - Ecommerce

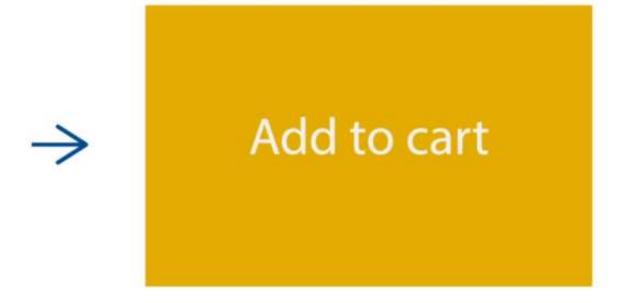

Search Products

Browse or Compare product

Sign In or Create account

Select shipping method

Payment Method (Credit Card, AMEX, PayPal, Venmo)

Add Shipping and Billing Address

Upsell or Special One time Offer

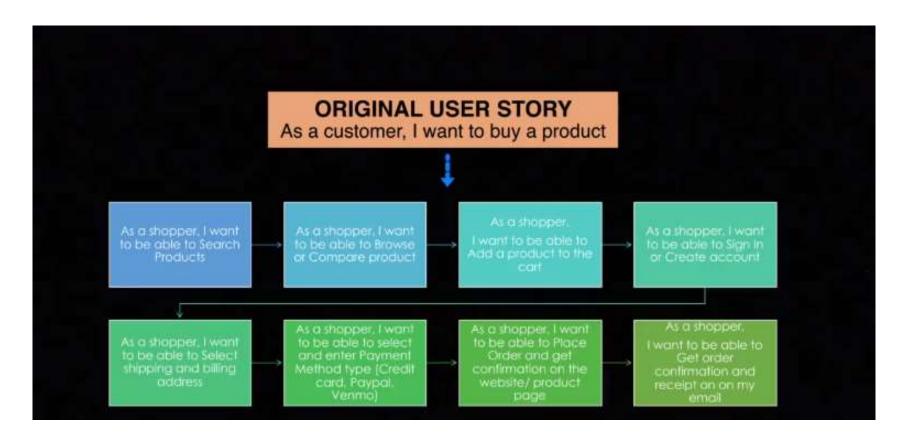

Get order confirmation on your email

Workflow Steps - Ecommerce

SPLITTING WITH CRUD

C = CREATE

R=READ

U= UPDATE

D= DELETE

BOARD GAME MARKETPLACE

WHERE THE BOARD GAMES ARE BOUGHT AND SOLD

MANAGING PRODUCT PAGE USER STORY

CREATE

As a seller,

I want to create a product description page

so that my buyer can check out the product description.

SPLITS

CREATE

READ

As a seller,

I want to create a product description page

so that my buyer can check out the product description.

As a game buyer,

I want to view (or read) product description page

so that I can determine if this is a product I want to purchase.

SPLITS

CREATE

READ

UPDATE

As a seller,

I want to create a product description page

so that my buyer can check out the product description. As a game buyer,

I want to view (or read) product description page

so that I can determine if this is a product I want to purchase.

As a seller,

I want to edit the description of the game

so that buyers will see the most up-to-date description.

SPLITS

CREATE

READ

UPDATE

DELETE

As a seller.

I want to create a product description page

so that my buyer can check out the product description. As a game buyer,

I want to view (or read) product description page

so that I can determine if this is a product I want to purchase. As a seller,

I want to edit the description of the game

so that buyers will see the most up-to-date description. As a seller,

I want to delete the product page of the game

so that buyers will only see the board games that are available.

MANAGE AD (Original User Story)

As a user...

- Create and Save the Ad
- View the Ad
- Delete the Ad
- Edit the Ad

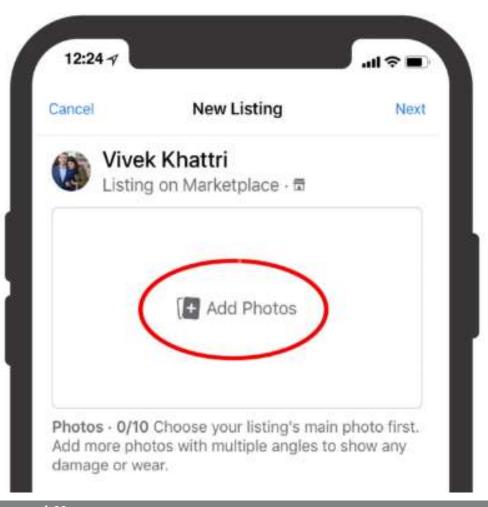

SPLITTING WITH ENTRY METHOD

As a seller,
I want to add pictures of my product

so that I can show my product.

E-commerce site

-CEC4

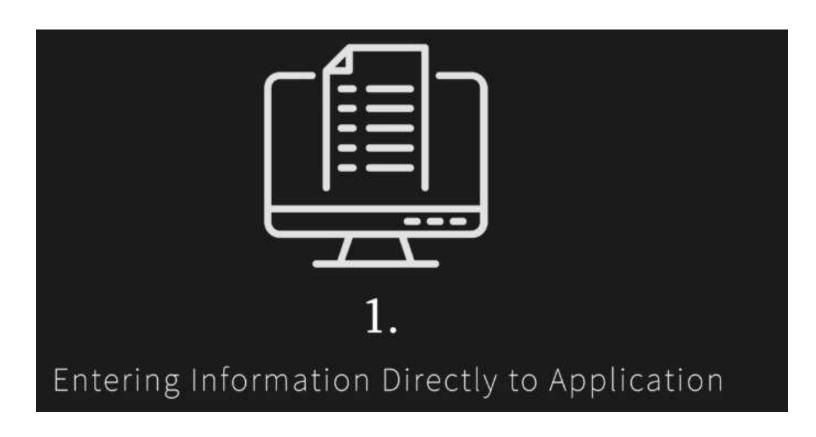

As a seller, I can... Upload Photos from Photo Gallery

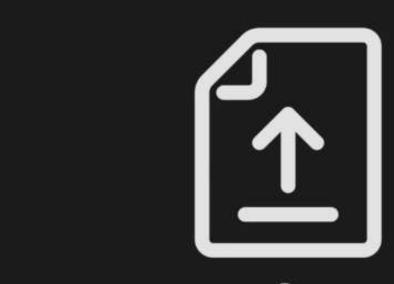

SPLITTING WITH ENTRY METHOD

"COMPLETE ACTIVITY"

ACTIVITY

- Application: You work for a file sharing and management company named EasyShare that has a web application as well as a mobile app (iOS & Android).
- Your team is focused on creating a feature that helps users manage and share files or documents (pictures, video, and word documents).
- Imagine, EasyShare is a dropbox or google drive like application.

ORIGINAL USER STORY:

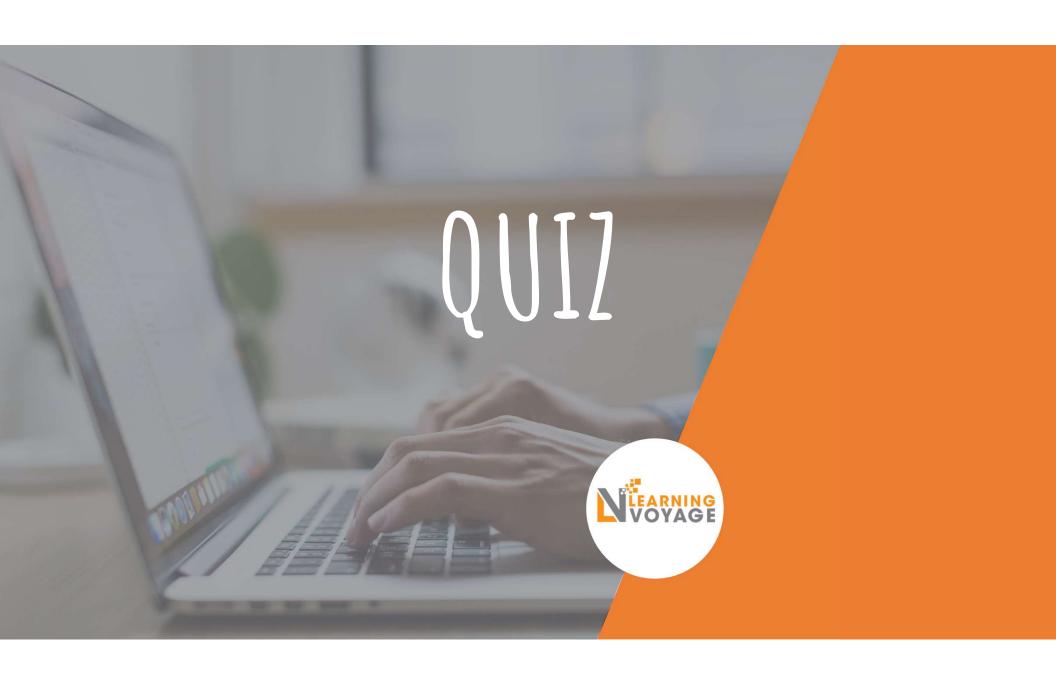

As a content owner, I want to organize, manage and share documents so that I can manage my documents

Acceptance Criteria:

- Content owner can upload content to their library within the application
- Content Owner can access the content they own
- Content owner can search through the content they have on the application
